- DGI's Drop Control Technology is a new world standard in the control of dot alignment.
- Prevents satellites for more vivid color and enhanced print quality.

RIP Software

DGI's printers and Wasatch SoftRip are tuned to provide the highest quality prints using DGI Original Inks.

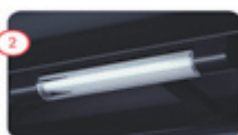

Enhancements for EASE OF USE

User Window on the Print Carriage

Now you can see working condition of the printheads during printing.

Print Status Lamp

This bright lamp makes it easy to see the printer status.

The Industry's Easiest to Use Ink Supply System

An easy access drawer for the ink tanks features level gauges & windows making it simple to check ink levels at any time. This also makes refilling the ink tanks clean and easy.

Front & Rear Pinch Lever

Designed so that one operator (not two) can easily load new media.
