Viper XPT-6000

THE BEST JUST GOT BETTER

The industry's first pre-treatment machine with a touch screen interface now provides even more control over the spray width, length and fluid laydown. The ViperXPT-6000 multi-nozzle system and smooth, accurate, consistent performance gives you the competitive edge in producing quality end garments with color fastness and durability. No air compressor is needed to get your ViperXPT-600 up and running... and start saving your shop time and money!

DEPENDABLE

- Consistently and Accurately Pre-Treat Garments

FAST

- Less than 10 Seconds Spray Cycle
